U.S. Patent and Trademark Office PTOL-326 (Rev. 7-05) Application/Control Number: 10/735,367 Page 2

Art Unit: 1774

1. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The word, "predetermined" is vague and indefinite and not understood as the true amounts/values of the limitations are not claimed. Applicants are requested to provide better claim language for examination.

In claim 7, the phrase, "may be increased" is not a positive manipulation.

In claims 12 and 14, tradename, PAN, is articulated.

Applicants are requested to make all related corrections.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1- 7 are rejected under 35 U.S.C. 102(b) as being anticipated by McCullough jr et al(US 5356707).

Application/Control Number: 10/735,367 Page 3

Art Unit: 1774

The cited reference teaches the claimed invention including electrically resistant tow having stretched carbon fibers- col 8, lines 54-68; col 10, lines 11-15. concerning claims 5 and 6, the reference teaches stabilizing step and apparent turbstratic orientation for its fibers within the tow— col 11, lines 36-40; col 11, lines 36-60. concerning claims 2-4, it is believed there would be carbon molecules being aligned via the aspect of the fibers being crimped- col 10, lines 65- col 11, line 22; col 13, lines 13-20. concerning claim 7, the reference teaches an increased electrical resistance in col 10, lines 6-8.

- 5. Claims 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over f McMullough Jr, et al (US 5356707). The reference teaches the basic claimed invention including a method for making a tow of several carbon fiber members, comprising stressing carbon PAN fibers, subjecting same to elevated temperature, adding additional types fibers thereto and blending the fibers to form a tow- col 9, line 44- col 10, line 15; col 11, lines 13-22;col 8, lines 54-68. concerning claim 16, the reference teaches stretch breaking process in col 10, line 35-37. concerning claims 15 and 17, it is submitted the types of fiber filaments used during the process is of no patentable consequences which must be manipulatively distinct.
- 6. Claims 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Schimpf et al(US 5098688).

The cited reference teaches the clamed invention including a process for a tow comprising stressing the tow, heating same at least twice- col 2, lines 54-68. concerning

Art Unit: 1774

claims 9 and 11, the reference teaches stabilizing steps and additing heating steps in col 2, line 54-68. concerning claim 12, the reference teaches PAN fibers in col 2, lines 11-15. concerning claim 13, the reference teaches graphitization in col 2, 2, lines 40-46. concerning claim 10, the reference teaches carbonization in col 2, lines 13-15 as required by claim 10.

7

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Paul Jr( US 5268158) is cited of interest for its teachings as set forth and additionally to show the state of the art.

8

Applicants who wish to send a facsimile (draft copies) for the examiner's immediate review can do so by using the Examiner's personal fax number at 571-273-1520. The faxing of all papers must conform with the notice published in the Official Gazette, 1096 O.G. 30 (November 15, 1989). NOTE: All facsimiles sent to the examiner's personal fax number should be in draft-forms and will be treated as informal.

Same facsimiles will not be entered in the related applications unless otherwise agreed and noted by the examiner.

The fax number for all other fascimile is 571-273-8300.

Art Unit: 1774

Information about **the status of an application** may be obtained from the Patent Information Retrieval system (**Private PAIR**).

Status inquires for **published applications** may be retrieved from either **Private PAIR** or **Public PAIR**. Questions about the PAIR system should be directed to the Electronic Business Center at **866-217-9197**.

Any questions concerning the instant communication should be directed to Examiner Dixon, at 571-272-1520, Mondays, Wednesdays and Thursdays, between 12 noon and 8 PM, eastern time.

Merrick Dixon
